EDUCATION

Bachelor of Computer Science

Umm Al-Qura University *Makkah, Saudi Arabia*
09/2022 - 06/2026,

GPA:3.58/4.00 | Graduated with Honors

Graduation Project: FREDT – AI-Powered Digital Twin for Disaster Management and Smart Evacuation.

WORKEXPERIENCE

IT Intern

Hiraa General Hospital

03/2025 - 07/2025,
Government healthcare institution providing medical services and healthcare support.

Key Responsibilities:

- Developed a Referral Management System using Python, HTML, CSS, and JavaScript.
- Assisted in IT support, troubleshooting, and system maintenance activities.
- Participated in system testing, documentation, and user support.
- Collaborated with healthcare staff to improve workflow efficiency and system usability.

Languages

- Arabic
★★★★★
- English
★★★★

CERTIFICATES

- Introduction to Cybersecurity – Cisco
- Performance Management – BSF Academy
- Financial Institutions and Markets for Beginners – BSF Academy
- Business Etiquette and Efficiency – BSF Academy
- AI ERA NEON Bootcamp – Artificial Intelligence Path

SKILLS

Python

Flask

JavaScript

HTML

CSS

SQLite

Machine Learning

YOLOv8

XGBoost

REST APIs

Git & GitHub

Cybersecurity Fundamentals

System Analysis

Problem Solving

Agile Development process

Software Documentation

Linux (Basic)

PERSONAL PROJECTS

FREDT–AI-Powered Digital Twin for Disaster Management and Smart Evacuation - Developed an intelligent evacuation platform using Flask, YOLOv8, XGBoost, SQLite, and A* Pathfinding for real-time emergency response and route optimization.

Referral Management System - Developed a web-based referral management system using Python, HTML, CSS, and JavaScript during internship training.

Chronic Kidney Disease Prediction - Developed a machine learning model for Chronic Kidney Disease prediction using healthcare datasets. Performed data preprocessing, model training, and performance evaluation.

Smart System for Finding Lost Pilgrims - Designed a smart system using AI, Computer Vision, and IoT technologies to help locate missing pilgrims during Hajj and Umrah. Integrated smart cameras and a mobile application to automate face matching and location tracking.

Cloud-Based Hospital Referral System - Developed a cloud-based Hospital Referral System using Salesforce Platform (PaaS). Designed custom objects, relationships, reports, and dashboards to improve referral tracking and healthcare data management.
